## NATIONAL INSURANCE CRIME BUREAU

The National Insurance Crime Bureau (NICB) is a not-for-profit membership organization supported by the insurance industry to provide unique solutions to the problems for detecting, preventing and deterring **INSURANCE RELATED CRIME**.

The NICB maintains a unique partnership with law enforcement and serves as a liaison between the insurance industry, law enforcement community and the vehicle manufacturers.

The following vehicle related information is available based on individual access levels to member insurance companies and law enforcement through ISO ClaimSearch and NLETS.

- NCIC/CPIC Theft File Mirror Image
- NCIC Cancelled and Purged Thefts
- ISO Insurance Thefts
- Vehicle Manufacturers Shipping and Assembly
- Vehicle Exports
- Vehicle Impounds
- ISO Salvage Vehicles
- Car Rental Fleets
- Auto Physical Damage
- License Plate Reader (LPR) Records

NICB's organizational structure is aligned around five core functions:

- Data Analytics
- Investigations
- Training
- Public Awareness
- Legislative Advocacy

Requests for information should be directed to NICB in Des Plaines, IL during normal business hours. NICB can also be reached directly, via the National Law Enforcement Telecommunications System (NLETS-ILNICB000). In case of an emergency, contact should be made through a local NICB agent.

**FEDERAL MOTOR VEHICLE THEFT  
LAW ENFORCEMENT ACT OF 1984  
FEDERAL THEFT PREVENTION STANDARD**

The Federal Motor Vehicle Theft Law Enforcement Act of 1984 became law on October 25, 1987. Pursuant to this law, a Federal Motor Vehicle Theft Prevention Standard was published on October 24, 1985, effective on April 24, 1986. The Federal Motor Vehicle Theft Prevention Standard is codified as a part of the Code of Federal Regulations (CFR) and can be found at 49 CFR Part 541 and Part 567.

The provisions of the Federal Motor Vehicle Theft Standard are summarized as follows:

**APPLICATION:** The standard applies to both major parts of Passenger Motor Vehicle lines designated as high theft lines and replacement parts for those lines.

**DERIVATIVES:** The full VIN must be used to identify all covered major parts except those manufacturers who were utilizing a derivative of the VIN of at least eight characters to identify engines and transmissions as of October 24, 1984 may continue to use the VIN derivative for engines and transmissions.

**MANNER OF IDENTIFICATION:** With the exception of "gray market"\* vehicles either labels or inscriptions may be used for both Passenger Motor Vehicle parts and replacement parts. Numbers must be indelibly printed on labels. Labels must be permanently affixed to the part on an interior surface at a location not normally exposed to damage in installing, adjusting or removing the part, or likely to be damaged in a collision, or damaged or obscured in normal dealer preparation operations, including operational after-market installation procedures.

Identification must be placed at a location that is visible without further disassembly once the part has been removed from the vehicle.

Removal of an identification label must cause the label to self-destruct by tearing or rendering the number on the label illegible and leaving residual parts of the label or its adhesive in that area. Alteration of the number contained on a label must either leave traces of the original number or visibly alter the appearance of the label.

A label and the number must be resistant to counterfeiting. The manufacturer's logo or some other unique identifier of the manufacturer must be placed in the material on the label.

**INSCRIBED IDENTIFIERS:** Non-label identifiers must be inscribed so that any removal or alteration visibly alters the appearance of the vehicle part. The identifier must be located so that it is visible without further disassembly once the part has been removed from the vehicle.

**LOCATION FOR IDENTIFIERS-TARGETS:** Each manufacturer that is the original producer who installs or assembles the covered major parts on a line covered by the standard must specify the location of the "Target" area for the placement of identifiers. The manufacturer must notify NHTSA in writing of this location no later than 30 days before the line is introduced into commerce.

**REPLACEMENT PARTS:** The identifier for replacement parts must consist of the manufacturer's registered trademark or some other unique identifier if the manufacturer does not have a

registered trademark, and the letter "R". These two characters must be at least one (1) centimeter in height.

The location or target area for the affixing or inserting of the identifier on replacement parts is to be selected by the manufacturer. The target area shall be at least 10 centimeters at all points from the nearest boundaries of the target area for an original equipment part. The manufacturer must notify NHTSA in writing of this location at the same time it informs the agency of the target area designated for the original equipment parts of the line.

**CERTIFICATION:** All 1987 and later model year passenger vehicles will be required to have affixed to them a revised 49 CFR part 567 safety certification label which includes the phrase "Safety, Bumper, and Theft Prevention".

Covered replacement parts for covered lines must have the symbol "DOT" in letters at least one (1) centimeter high appearing within 5 centimeters of the trademark and the letter "R" inscribed or affixed to the part within the same target area as the trademark and "R" are required to be located. The same requirement also covers gray market parts.

Gray market vehicles of lines covered by the theft prevention standard are required to have a certification label affixed prior to importation into the United States. This label will be in addition to, and not in place of, the label presently provided for in 49 CFR Part 567.

The label must be permanently affixed in such a manner that it cannot be removed without destroying or defacing it. The label must be affixed to the hinge pillar, door-latch post or the door edge that meets the door latch post next to the driver's seating position. Alternate locations are specified in the standard in the event that the primary locations are not practicable. The label must contain: model year, line, name of importer, and the statement -- "This vehicle conforms to the applicable Federal Motor Vehicle Theft Prevention Standard in effect on the date of manufacture."

**ANTI-THEFT DEVICE EXEMPTION:** Section 605 of Title VI of the Motor Vehicle Information and Cost Savings Act, enacted as part of the Federal Motor Vehicle Theft Law Enforcement Act of 1984 creates an exemption from the vehicle theft prevention standard for vehicle lines equipped by the manufacturer with a standard equipment anti-theft device determined by NHTSA to be as effective in reducing and deterring motor vehicle theft as compliance with the theft prevention standard. Under the law each manufacturer must petition NHTSA for this exemption. For each model year through model year 1996, a manufacturer may petition NHTSA to grant exemptions for up to two additional lines of its passenger motor vehicles. For each of model years 1997 through 2000, a manufacturer may petition NHTSA to grant an exemption for one additional line of its passenger motor vehicles. For model years after 2000 the Attorney General will determine the number of lines to be exempt. Updated information on the number of vehicle lines exempted is available from NHTSA or at 49 CFR Part 541 Appendix A and Appendix A-1.

---

\* = "Gray Market" is a term used to describe those vehicles imported into the United States that were not originally manufactured for distribution or sale in this country. As manufactured, these vehicles do not meet safety, emissions, bumper, or theft prevention standards established by the United States Government. Compliance procedures have been established by the Government that will bring the gray market vehicle into conformity with the required standards. Upon certification of compliance with these standards by the importer, the vehicle may remain in the United States.

(Number in parenthesis indicates MY vehicle became exempt)

## 

#### 

The final rule which became effective September 1, 2007, extends the parts marking requirement to all passenger cars, multipurpose vehicles (MPVs) with a GVWR of 2,722kg (6,000 pounds) or less, and certain light duty (LDTs) with a GVWR of 2,722kg (6,000 pounds) or less that were previously not subject to the parts marking requirements. LDTs are excluded from the parts marking requirements unless they have interchangeable parts with vehicles that are required to be marked or unless they have been determined to be high theft.

#### 

1. Passenger motor vehicle parts that are present in vehicles manufactured by a motor vehicle manufacturer that manufactures fewer than 5,000 vehicles for sale in the United States each year.

2. Passenger motor vehicle parts that are present in a line with an annual production of not more than 3,500 vehicles.

3. Passenger motor vehicle parts that are present in light duty trucks with a gross vehicle weight rating of 6,000 pounds or less, that NHTSA has determined to be subject to the requirements of this section in accordance with 49 CFR 542.2, if the vehicle line with which these light duty trucks share majority of major interchangeable parts is exempt from parts marking requirements pursuant to part 543.

#### 

Each passenger motor vehicle subject to parts marking must have an identifying number affixed or inscribed on each of the parts listed below if the part is present on the motor vehicle.

- Engine
- Transmission
- Front fenders (left and right)
- Hood
- Front doors (left and right)
- Rear doors (left and right)
- Sliding or cargo door(s)
- Bumpers (front and rear)
- Rear quarter panels (left and right)--PC
- Side assemblies (left and right)--MPV
- Pickup box and/or cargo box--LDT
- Rear door(s) (both doors in case of double doors), decklid, tailgate, or hatchback (whichever is present)

## VEHICLE IDENTIFICATION NUMBERS

Since 1954, the American automobile manufacturers have used a Vehicle Identification Number (VIN) that describes the vehicle for purposes of identification. Variations exist in VIN locations and VIN systems used by the different manufacturers as well as from year to year by each manufacturer.

The "Vehicle Identification Number" taken from the locations stated and decoded as instructed in the text of this manual provides a true description of the vehicle to which it was assigned.

The material used to prepare the Passenger Vehicle Identification Manual is supplied to the National Insurance Crime Bureau by the individual automobile manufacturers and other reliable sources.

**It should be understood that occasionally certain identifiers or other information may not be listed in this manual as it was unavailable at time of publication.**

## VIN PLATE ATTACHMENT

### ROUND HEAD "POP" RIVET ALUMINUM, STAINLESS STEEL OR PLASTIC

Used on early General Motors vehicles prior to 1965 after departure from "spot weld" method of attaching VIN plates. Still used by most foreign manufacturers.

**Note:** Most European rivets have a smaller center hole than the American version.

### 6 PETAL "ROSETTE" TYPE RIVET ALUMINUM OR STAINLESS STEEL

Used by General Motors Corp. since 1965, Chrysler Corp. since 1966 and Ford Motor Co. since 1970.

**Note:** There are some assembly plants in North America currently using round head pop rivets. Your NICB field Agent can assist in verifying the authenticity of these various rivets.

### 5 PETAL "ROSETTE" TYPE RIVET ALUMINUM

Used by Toyota since 1985, except for the 1985 Corolla front wheel drive, diesel, and 1989 and 1990 Cressida models which have round aluminum rivets.

### SHEET METAL SCREWS

Screws are occasionally used to attach VIN plates on some imported vehicles.

**Note:** From 1974 thru the present, some manufacturers are using VIN plates with both concealed and exposed rivets.

## PUBLIC VIN LOCATION

Beginning with 1968 passenger cars, Vehicle Identification Number (VIN) plates appeared in the windshield area; Ford on the right in 1968 (and a few in 1969). All manufacturers were on the left in 1970, including the foreign manufacturers. Starting in 1970, all passenger cars sold in the United States were assembled with the VIN plate attached to the left side of the dash or instrument panel, visible through the windshield. There are more than one exception. The Corvette, prior to 1984, displays the VIN attached to the left side windshield post. In addition, there are several imports that have the VIN plate affixed to the left side windshield post.

Many automobiles of foreign manufacture are now distributed in the United States. In earlier years, most of these vehicles were produced in a series without regard to model years. Many foreign manufacturers later adopted systems similar to the United States whereby the VIN was descriptive and furnished complete information about the vehicle. In some instances the model year was determined by the beginning and ending sequential serial number.

Beginning in the mid-1990's, certain vehicle manufacturers (i.e. BMW, Mercedes-Benz) began using a public VIN label instead of a plate, with no rivets. This public VIN label may be seen in additional vehicle makes and models. NICB field agents may be of assistance in authenticating public VINs.

## VEHICLE IDENTIFICATION NUMBER STANDARDIZATION

Beginning with the 1981 model year, the National Highway Traffic Safety Administration (NHTSA), Department of Transportation, required manufacturers to assign a 17-character vehicle identification number (VIN) for over-the-road vehicles sold in the United States.

This standard establishes a fixed VIN format including a check digit and applies to all passenger cars, multi-purpose passenger vehicles, trucks, buses, trailers, incomplete vehicles and motorcycles. This manual covers VINs for high volume manufacturers. For VIN standardization information for low volume manufacturers please visit NHTSA's website: [www.nhtsa.gov](http://www.nhtsa.gov).

The first section consists of three characters that occupy positions one through three (1-3) of the VIN & are designated as the Manufacturer Identifier (WMI). The WMI uniquely identifies the Manufacturer and Type of Vehicle.

The second section has five characters which occupy positions four through eight (4-8) and are designated the Vehicle Attributes Section. This section uniquely identifies the attributes of the vehicle such as Make, Model, Body Style, Engine, etc.

The third section consists of one character, which occupies position nine (9) and is called the check digit. After all other characters in the VIN have been determined by the manufacturer, the check digit is calculated by carrying out the mathematical computation specified by NHTSA.

The fourth section of the VIN is located after the check digit. It is eight characters in length and is called the Vehicle Identification Section & occupies positions ten through seventeen (10-17). The tenth character represents the vehicle model year; the eleventh character represents the plant of manufacture; and the last six characters represent the sequential production number.

**1C3 CDFCH 9 DD576100**

# SUPPLEMENTAL IDENTIFICATION FEDERAL MOTOR VEHICLE SAFETY CERTIFICATION LABEL

Since 1970, the U.S. Government has required motor vehicle manufacturers to display a **Safety Certification Label** on all motor vehicles distributed in the United States. Among the data required on the certifying label is the date of assembly and the **Vehicle Identification Number**. Shape and size of the labels, as well as the materials from which they are constructed, will vary among manufacturers. More common among domestic manufacturers is a paper label covered with a clear mylar type plastic. The label is bonded to the vehicle with a mastic compound. Construction is such that the label should destruct if removal is attempted. Some foreign manufacturers construct the certifying label out of thin metal and attach it with rivets. In either case, security against removal and replacement is not absolute. **The Vehicle Identification Number displayed on the certification label should serve as supporting identification evidence only and should not stand alone as positive vehicle identification.**

## VEHICLE MODEL YEAR

|               |               |               |

# PASSENGER VEHICLES

This section of the NICB Passenger Vehicle Identification Manual describes the passenger vehicles produced for sale in North America and includes decoding of the VIN structure for those carline series produced within the last two model years and is as accurate as possible at the time of publication.

## VEHICULOS PARTICULARES

Esta sección del manual explica sobre la identificación de vehículos particulares y describe los vehículos fabricados para el mercado Norte Americano, incluyendo la manera de descifrar el orden numérico de identificación vehicular (VIN), referente a las líneas de automóviles producidas dentro de los últimos dos años. Es la información actual.

Para términos en Español consultar las páginas: 249 a 252.

## NOTES

## SNOWMOBILES

### GENERAL INFORMATION ON SNOWMOBILES

Snowmobiles generally contain three public identification numbers: the VIN stamped into the tunnel, a Federal Safety Certification label bearing the VIN, and an engine serial number.

With a few exceptions, the VIN will be found on the right side of the frame of the vehicle, which is actually the tunnel.

The engine serial number will generally be stamped into the crankcase housing or may be found on a plate attached to the engine with drive nails; they can be cross-referenced to a VIN by the factory.

Identification of these units can be difficult and care should be taken to determine a VIN.

Manufacturers' records can also be of significant help in making an identification.

The Arctic Cat Snowmobile has a public Vehicle Identification Number (VIN) and an Engine Serial Number.

Prior to the 2000 model year, the VIN was a series of seven numbers (i.e. 9805654). The first two numbers represented the model year, and the last five numbers were the sequential production numbers.

Starting with the 2000 model year, Arctic Cat began using a seventeen character VIN.

The public VIN is on the right side of the tunnel, adjacent to the right side footrest. The Federal Safety Certification Label is an adhesive label bearing the VIN.

|                         |          |          |          |          |          |          |          |             |          |          | VALCOURT, QUEBEC, CANADA   |          |          |          |          |          |
|                         |          |          |          |          |          |          |          |             |          |          | MODEL YEAR <b>D = 2013</b> |          |          |          |          |          |

Prior to the 2000 model year, the Vehicle Identification Number (VIN) was a nine-digit number (i.e. 3794-12345). The first four digits represented the model and the last five digits were the sequential production numbers.

Starting with the 2000 model year, Bombardier began using a seventeen character VIN.

The public VIN is on the right side of the tunnel, adjacent to the right side footrest. There will also be a Federal Safety Certification Label bearing the VIN.

# BOATS

## GENERAL INFORMATION ON BOATS

United States Coast Guard standards for Hull Identification Numbers (HINS) were established in 1972 (no uniform Hull Identification Numbers prior to 1972). The following is a sample of the adopted Hull Identification Number formats:

### STRAIGHT YEAR

November 1, 1972

### MODEL YEAR

November 1, 1972

#### \*KEY TO MONTH OF PRODUCTION FOR MODEL YEAR FORMAT

|               |              |              |          |
|---------------|--------------|--------------|----------|
| A - August    | D - November | G - February | J - May  |
| B - September | E - December | H - March    | K - June |
| C - October   | F - January  | I - April    | L - July |

### NEW FORMAT

Optional January 1, 1984  
Mandatory August 1, 1984

#### \*KEY TO MONTH OF PRODUCTION FOR NEW FORMAT

|              |           |               |              |
|--------------|-----------|---------------|--------------|
| A - January  | D - April | G - July      | J - October  |
| B - February | E - May   | H - August    | K - November |
| C - March    | F - June  | I - September | L - December |

## COUNTRY OF ORIGIN CODES AND REVISION OF REGULATIONS ON HULL IDENTIFICATION NUMBERS \*

The Coast Guard revised its regulations to allow U.S. manufacturers of recreational boats to display a 2-character country of origin code before the 12-character Hull Identification Number (HIN) without separating the two by means of borders or on a separate label. This removal of our previous restriction will allow U.S. manufacturers to comply with the International Organization for Standardization (ISO) HIN standard, without changing the information collected by States on undocumented vessels that they register because the U.S. HIN remains only 12 characters.

### \*Reference: 33 CFR Part 181

DEPARTMENT OF HOMELAND SECURITY  
COAST GUARD

(This final rule was effective as of August 16, 2004)

## PERSONAL WATERCRAFT

In accordance with federal law, a personal watercraft must bear a primary Hull Identification Number (HIN). The HIN must be placed on the right aft side of the outboard hull no more than two inches from the top of the gunwale and within one foot of the stern.

## PERSONALIZED WATERCRAFT CODES (PWC)\*

| PWC | MANUFACTURER<br>or BRAND NAME | PWC | MANUFACTURER<br>or BRAND NAME |
|-----|-------------------------------|-----|-------------------------------|
| ARJ | Arctic Cat (Tiger Shark)      | SIT | Wetjet (1983 - 2002)          |
| HPS | Honda                         | WET | Wetjet (1993 - 2003)          |
| KAW | Kawasaki (Jet Ski)            | YAM | Yamaha                        |
| PLE | Polaris                       | ZZN | Bombardier (Sea Doo)          |

### \*These Lists Do Not Include All Manufacturers

## ESTANDARIZACION DE NUMEROS PARA IDENTIFICACION DE VEHICULOS

Al partir de 1981, la Administración Nacional del Tráfico Carretero del Departamento de Transporte (NHTSA por sus siglas en inglés), requirió que los fabricantes de vehículos de auto-transporte en los Estados Unidos produjeran los vehículos con Número de Identificación Vehicular (VIN) de 17 caracteres.

Este estándar establece un formato fijo para el VIN incluyendo un dígito de control y aplica a todos los vehículos de pasajeros, vehículos de pasajeros de usos múltiples, camiones/camionetas, autobuses, tráiler, vehículos incompletos y motocicletas. Fabricantes de volúmenes bajos, favor de visitar la página de internet de NHTSA: [www.nhtsa.gov](http://www.nhtsa.gov) para información sobre la estandarización del VIN.

La primera sección consiste de tres caracteres que ocupan las posiciones uno a tres (1-3) del VIN y están designadas como el Identificador Mundial del Fabricante (WMI por sus siglas en Inglés). El WMI identifica de manera única al Fabricante y el Tipo de Vehículo.

La segunda sección consta de cinco caracteres que ocupan las posiciones cuarta a octava (4-8) y designan la Sección de Atributos del Vehículo. El VDS identifica en forma única los atributos del vehículo como el Modelo, Estilo de Carrocería, Motor, etc.

La tercera sección consiste de un caracter que ocupa la novena posición (9) y se denomina dígito de control. Una vez que los demás caracteres del VIN se han determinado por el fabricante, el dígito de control se calcula por medio de un cómputo matemático especificado por NHTSA.

La cuarta sección del VIN se localiza después del dígito de control. Consiste de ocho caracteres y se denomina Sección de Identificación Vehicular y ocupa las posiciones décima a decimoséptima (10-17). El décimo caracter representa el año del vehículo; el onceavo representa la planta de manufactura; y los últimos seis caracteres representan el numero secuencial de producción.

### Ejemplo del número de matrícula vehicular (VIN)

## ABREVIACIONES Y DESCRIPCIONES

| ABREVIACIONES             | DESCRIPCIONES                                   |
|---------------------------|-------------------------------------------------|
| 2WD                       | Tracción Delantera                              |
| 4 Cyl, 5 Cyl, 6 Cyl, etc. | Número en Cilindros en Línea del Motor          |
| 49 State                  | Vendido en Todos Los Estados Excepto California |
| 4A, 5A, 6A                | Número de Velocidades Automática                |
| 4V, 16V, 24V, etc.        | Número de Válvula del Motor                     |
| 4WD                       | Doble Tracción                                  |
| 4x2                       | Tracción de Dos Ruedas                          |
| 4x4                       | Doble Tracción                                  |

## **International Association of Marine Investigators**

**Committed to Training Investigators Worldwide**

The International Association of Marine Investigators, Inc. (IAM I ) is a non-profit international organization dedicated to combating marine theft and related crimes. Established in 1990, IAM I is comprised of more than 2,000 law enforcement, insurance industry and marine community representatives.

IAM I members represent local, state, federal and provincial police agencies, the National Insurance Crime Bureau, the Insurance Bureau of Canada, the U.S. Coast Guard, administrative officials of vessel registering or titling authorities, marine surveyors, and other interested persons.

The primary objectives of the association are to provide marine accident, theft and fraud investigation training, to develop and disseminate marine accident, theft and fraud educational materials, and to provide a forum for the discussion of marine related investigative activities and other topics of interest.

IAM I provides training and education through various outreach programs to the marine community. It conducts an annual three-day training conference in the United States, and a two-day training conference in Europe.

All inquiries or membership applications should be directed to IAM I's Exective office, 711 Medford Ctr #265, Medford, OR 97504. Payment of dues must accompany a completed IAM I membership application and should be made payable to IAM I. Members located outside the United States should make their dues payable in United States dollars.

**For further information visit the IAM I website:  
[www.iamimarine.org](http://www.iamimarine.org)**

**IAM I is a Non-Profit Association - FID#59-3231932**

## INTERNATIONAL ASSOCIATION OF AUTO THEFT INVESTIGATORS

The International Association of Auto Theft Investigators (IAATI) is a professional organization of more than 3,700 members worldwide, from over 63 countries.

Active IAATI members represent local, state, federal and provincial police agencies, the National Insurance Crime Bureau (NICB), the Investigative Services Division of the Insurance Bureau of Canada (ISD/IBC), insurance Professionals, State Motor Vehicle Agencies and the Car Rental Industry.

The primary goal of IAATI is to "encourage high professional standards of conduct among auto theft investigators." IAATI strives for cooperative dissemination of technical information on vehicle theft and related crimes to its members.

IAATI conducts training seminars in cooperation with universities and colleges, local, state, federal, and provincial police agencies, the National Insurance Crime Bureau (NICB), and the Investigative Services Division of the Insurance Bureau of Canada (ISD/IBC). At these seminars, IAATI members examine challenges and problems in the field on investigative techniques, security, legislation and regulation, so that they may more effectively serve the public. IAATI seminars provide forums where common concerns can be discussed and members can review the newest educational, informational and advisory services available.

Each IAATI member receives a news magazine (the APB), which offers information on vehicle theft data, new modus operandi, current court decisions related to vehicle theft and stolen vehicle titling information and access to the IAATI web site "Members Only" section. This allows all members the capability to search or download the IAATI membership database, as well as other pertinent information regarding IAATI services and training programs.

All inquiries or membership applications should be directed to IAATI, P.O. Box 223, Clinton, NY. 13323-0223. Payment of dues must accompany a completed IAATI membership application and should be made payable to IAATI. Members located outside the United States should make their dues payment in United States dollars. Dues are \$45.00 for a new member and \$30.00 for a renewal membership.

**For further information visit the IAATI website:  
[www.iaati.org](http://www.iaati.org)**

## NORTH AMERICAN EXPORT COMMITTEE

### MISSION/VISION BACKGROUND

#### NAEC MISSION

The mission of the NAEC is to bring together those entities that share a common goal of combating the exportation of stolen vehicles and to facilitate contacts for the exchange of information and ideas to achieve that goal.

#### NAEC VISION

The NAEC vision is to provide a model plan that can be implemented at every port to stop the exportation of stolen vehicles. This model includes verifying the validity of both vehicle and supporting documentation. It also includes methods of identifying vehicles hidden inside containers without interfering in the daily commerce of the ports.

**For further information visit the NAEC website:**

# INTERNATIONAL ASSOCIATION OF SPECIAL INVESTIGATION UNITS

---

## About Us

The International Association of Special Investigation Units (IASIU) membership is made up of thousands of individuals representing hundreds of insurance and self-insured companies around the world. Members are employees of insurance or self-insured special investigation units, special agents, or supervisors of the National Insurance Crime Bureau (NICB) or Insurance Crime Prevention Bureau. Associate members are insurance company personnel who support the investigative process and the law enforcement community involved in insurance fraud investigation.

## IASIU Mission

Founded in 1984 by a group of insurance industry fraud investigators, the International Association of Special Investigation Units is a non-profit organization dedicated to:

- Promoting a coordinated effort within the industry to combat insurance fraud;
- Providing education and training for insurance investigators;
- Developing greater awareness of the insurance fraud problem;
- Encouraging high professional standards of conduct among insurance investigators;
- Supporting legislation that acts as a deterrent to the crime of insurance fraud.
